

Just Received
A large shipment of New Living Room Suits
and Bed Room Suits
LESTER B. HARVEY
Phone 8103

Avoid that breakdown far from home...

Prevent those frantic wires!

Just start with **Esso** Dealer care,
and tough, new **ATLAS** Tires!

DON'T LET A HAPPY TRIP BE MARRED BY "bad luck" that needn't happen! Let your **Esso** Dealer check your car now—oil, chassis lubrication, battery. And be sure he checks your tires. Then replace doubtful ones with quality **ATLAS** Tires. See how wide and deep the **ATLAS** tread is! Read the remarkable written warranty covering every **ATLAS** Tire. Then, on the road, watch for the **Esso** sign. Make it your regular stopping place. Remember that "Happy Motoring" starts at the **Esso** sign.

NOTE: If your dealer does not have the size **ATLAS** Tire you need, place your order now for future delivery.

Uncle Sam Says

Sucker bait is a phrase you have heard used or used yourself many times. Anglers know its meaning when they watch the fish bite for the impossible. The term also applies to individuals who send their hard-earned cash on get-rich-quick errands. Your income invested in United States Savings Bonds will mount steadily and safely in value to serve you 10 years hence. The American who buys bonds regularly with the dollars he doesn't need today for living costs will not wind up a poor fish. U. S. Treasury Department.

AMERICAN FOUNDATION FOR ANIMAL HEALTH

SWINE ERYSIPELAS IS NOW IN ALL STATES

One of America's newest swine diseases—erysipelas—rapidly becoming one of its worst. In 1939 it was reported in 28 states today.

Symptoms include sudden deaths, arched backs, lameness, high fever and unwillingness of the hogs to move. Due to the complexity of the symptoms, a veterinary diagnosis is generally necessary to determine whether erysipelas or some other disease occurs in swine. The quick type causes immediate death and moves rapidly through the droves. The lingering type causes enlarged joints and sometimes sloughing of the skin.

Fortunately, a very effective vaccine has been developed—and this is proving extremely valuable in coping with erysipelas in areas where it has become a problem. The important feature is that it should be given as soon as possible after the pigs are farrowed, because erysipelas very commonly strikes pigs when they are only a few days old. Current time, have it hogs do start doing or erysipelas in the control of the disease promptly, because rats and other vermin can act as spreaders and cause disease production in the swine community.

Note the enlarged joints, typical of chronic type of erysipelas.

Perhaps the most difficult problem about coping with swine erysipelas is the fact that it often resembles cholera, and in some of its aspects it may resemble other swine diseases.
